

□■ OTIS

WE ONLY MAKE PREMIUM  
EYEWEAR FROM NATURALLY  
SOURCED, DISTORTION-FREE,  
SCRATCH RESISTANT, MINERAL  
GLASS LENSES

Mineral Glass is created from natural elements like sand and soda ash. It's endlessly recyclable and harmless to humans and animals alike. It's high resistance to scratching and lack of distortion make it the world's best lens material.

It really does have to be Mineral Glass.

# PLAY WITH GLASS

OTIS' new campaign "Play with Glass" is a statement that symbolises our lifestyle and the act of having fun, pairing it with OTIS' unique product feature - Mineral Glass Lenses. It's about living an active lifestyle and viewing it through a distortion free, scratch resistant, mineral glass lens. Indirectly this statement can also be taken as the spirit of youthful rebellion, playing with something that is potentially dangerous. The old expression - you're playing with fire.

"Play with Glass" was conceptualised for retail. We bring our campaign message to life at the point of sale with original interactive displays. Our aim is to educate the customer by enabling them to experience the benefits of Mineral Glass in a fun and interactive way.

#playwithglass

□■ OTIS

MINERAL GLASS LENSES PROVIDE THE MOST

# DISTORTION FREE

VISION OF ANY LENS MATERIAL IN THE WORLD.

MINERAL GLASS IS THE MOST

# SCRATCH RESISTANT

LENS MATERIAL IN THE WORLD.

## LIFETIME WARRANTY

Our goods come with guarantees that cannot be excluded under Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

OTIS sunglasses are constructed using the highest quality materials available. Each component is individually quality checked before being carefully packaged, ready for sale. OTIS sunglasses have a lifetime warranty against defects in materials and workmanship. Damage to lenses, frames and other components due to normal wear and tear are not covered under the warranty. All warranty claims must be accompanied with a proof of purchase.

Where a warranty claim is accepted, OTIS has the right to repair or replace at no cost to you. If not deemed to be a valid warranty, OTIS will offer a suitable replacement at a reasonable charge subject to availability.

**Scratched and broken lenses are not covered under warranty.**  
Mineral glass is the most scratch resistant lens material available, but it is not scratch proof. All OTIS lenses exceed the strictest Australian, USA, and European standards for quality and strength. However, mineral glass lenses can scratch or crack if not cared for properly.

Simply email [cs@otisewear.com](mailto:cs@otisewear.com) to obtain a return address and paperwork for your return. OTIS offers a Reply Paid service for all returns, but is not liable for goods in transit. OTIS recommends returns to be safely packaged and insured (at customers expense). All return paperwork must include full name, return address (no PO Box), contact number, email address and Proof of Purchase if a warranty is being claimed.

For any further enquiries: [cs@otisewear.com](mailto:cs@otisewear.com)

## ABOUT MINERAL GLASS LENSES

Our standard fixed tint mineral glass lenses are 2.0mm thick and thermally toughened. Our polarised lenses consist of two chemically toughened glass wafers laminated with a polarised film under heat and pressure - the result is a 2.1mm thick lens. It should also be noted that once our lenses are cut to fit the frames, the edges of the lenses are heat sealed to stop any water/mist getting between the layers.

### • MINERAL GLASS •

A hybrid glass half the weight & twice the strength of standard crown glass - provides distortion free vision and is making it the perfect lens material.

Precision ground mineral glass

Glass is the most scratch resistant lens material in the world.

• SCRATCH RESISTANT •

Mineral Glass provides the most permanent and stable tints of any lens

- OTIS lenses will not warp, peel or fade over time.

### • PERMANENT TINTING •

Two processes by which the natural toughness of glass is even further enhanced to increase durability.

• CHEMICAL / THERMAL HARDENING

A hybrid glass half the weight & twice the strength of standard crown glass - provides distortion free vision and is making it the perfect lens material.

Mineral Glass provides the most permanent and stable tints of any lens

- OTIS lenses will not warp, peel or fade over time.

### COOL GREY

Versatile, general purpose lens providing natural vision and true colours.

### TROPICAL BROWN

A contrast enhancing lens that sharpens detail by blocking glare and scattered blue light making it ideal for bright conditions.

### GREY POLARISED

Reduces glare from both direct and reflected light. Polarising filters cut glare from the surface of water, snow and bitumen roads. Ideal for driving and high glare situations.

### BROWN POLARISED

A contrast enhancing lens that sharpens detail by blocking glare and scattered blue light, making it ideal for bright conditions. Reduces glare from both direct and reflected light.

## STANDARDS

OTIS sunglasses meet or exceed these standards: US Standard ANSI Z80.3 (1986), Australian & New Zealand Standard AS/NZS1067 (2003), European Standard EN 1836 (1997). All OTIS sunglasses bear the CE mark which demonstrates that our products meet the requirement of the European directive 89/686 EEC and meet the requirements of prEN 1836:1996

## FRAME SHAPE / MATERIALS & CONSTRUCTION

### TR90 GRILAMID FRAMES

High performance and low weight ratio. TR90's high-performance property profile and processability makes it an ideal optical engineering plastic. The transparency, rigidity and impact strength of Grilamid compare favourably to other transparent polymers like polycarbonate. It is the lightest engineering plastic in existence, maximising wearer comfort.

### HANDMADE ACETATE FRAMES

Made with premium quality acetate (originating from renewable resources wood pulp & cotton fibre), the ideal material for making durable eyewear. Its hue is embedded within the product rather than sprayed onto the surface, retaining colour brightness and preventing peeling & fading. OTIS handmade frames have stainless steel wires injected into the temples for adjustability - a task best performed by an Eye Care Professional.

### VISSOTTICA HINGES WITH STAINLESS STEEL SCREWS

OTIS frames are produced with high quality 5 and 7 barrel hinges. These premium grade Vissottica brand hinges are extremely durable and boast 100% corrosion resistance.

### ABOUT 'BASECURVE'

Lens 'Base Curve' is the measure of the general shape of a lens. The 'Base' is the front curve of the lenses (measured in 'dioptres'). You can see the variations in the models displayed above.

### 6 BASE OR 8 BASE: WHAT'S THE DIFFERENCE?

The 8 base lenses have a more curved frame while still providing distortion free vision. 6 base lenses are generally flatter across the front.
